

PROTECT YOUR BODY YOUR TEMPLE

Get the Facts about Sickle Cell Disease and Sickle Cell Trait.

Sickle cell disease is an inherited blood disorder that affects red blood cells and causes organ damage, anemia, and lifelong episodes of pain.

The disease most commonly affects people of African, Asian, Mediterranean, Central and South American ancestry.

About 70,000 Americans are currently diagnosed with sickle cell anemia.

Newborn screening for sickle cell disease and trait is required in South Carolina and most other states.

One in 10 African Americans has the sickle cell trait. Knowing if you have the trait is important!
